CMMC 2.0 Gap Assessment and Audit Readiness

"Every single business doing <u>any</u> kind of business with the Department of Defense will need to get certified and get a third-party audit that they have basic cyber hygiene." (Pentagon)

Asante Cloud can help you manage your journey to CMMC 2.0 compliance. The first step would be a **no-cost** consultation to discuss your situation, current compliance level and in-house capabilities. For many clients, the next best step would be a CMMC 2.0 GAP Analysis and Audit Readiness Assessment.

Asante Cloud provides net neutral oversight and depending on your needs, can engage strategic delivery partners such as Silent Sector, Cohn Reznick, Crowdstrike, Zscaler, Check Point, Proofpoint and Okta.

We are also working closely with AWS on delivering secure CMMC technology such as Landing Zone Accelerator (LZA) on AWS and Research Workbench for Higher Ed and Research Institutions.

Each CMMC journey is different, and services can be tailored to your needs:

CMMC 2.0 GAP Assessment & Planning:

- CMMC 2.0 Gap Assessment
- Compliance Alignment Roadmap Development
    - Plan of Action and Milestones (POAM)
    - System Security Plan (SSP)

Additional CMMC 2.0 Compliance Alignment Services:

- Fractional Information Security Department Support (NextGen vCISO)
- CMMC Compliance Program Management
- Cybersecurity Policy Documentation Development
- Incident Response and Disaster Recovery Planning and Testing
- Continuous Vulnerability Scanning
- Managed Security Awareness Training
- System Architecture & Dataflow Diagram Development

- Penetration Testing
- Representation through the CMMC 2.0 audit process

A true CMMC GAP assessment is not something you will get from monitoring software and should never be treated as a "check the box" exercise. Our professionals focus on strategic and tactical readiness support to get your organization prepared for formal CMMC 2.0 audits.

Our team provides the expertise and support to align your organization to the requirements and will even represent you through the audit process with a C3PAO. We will even help you evaluate and find the right C3PAO auditing firm. CMMC frequently asked questions may be found @ https://dodcio.defense.gov/CMMC/FAQ/
